3108482	Snow Bar	Client would like to know if it would be possible to add a Snow Bar item in the database.	New Item "Snow Bar" has been added and will be available in the August database update.
3108893	Heavy Clean	The customer is looking for a clean item for heavy soot and light soot for walls/ceilings, on a fire claim. Other than heavy textured walls/ceilings and light textured walls/ceilings there is no clean item in the database relating to cleaning of heavy soot or light soot. Clean with a dry chemical sponge item should also be added.	CoreLogic will be launching a "heavy clean" for virtually all items that currently have a standard clean. The new "Heavy Clean" is intended to be used for smoke/soot cleaning and other challenging circumstances, and will incorporate the use of dry chemical sponges and Hepa vac. These items will be added to the September or October Database Update.
3108966	Steel Siding	The client would like to have Steel Siding added as an item in the USDC database.	The item Siding, Steel Strip is currently available in the USDC database. It can be found in the SDG-Other category. Supporting items such as J- Channel, Steel; Corners Steel, Outer; and Corners Steel, Inner are also located in the SDG-Other sub category. F- Channel, Steel is located in the SFG, Soffit, Fascia & Gutters category in the SFG-Soffit Subcategory.
