Release Notes   **January 2019**

CoreLogic Database Update

Summary of Changes:

- 1 RFI closed for the month of December

RFI's closed during December 2018

ID	Title	Content	Comments
5803	Masonry	Client was looking for a skim coat or "parge" coat of a concrete wall in database today and could not find anything. Closest was "patch" concrete wall which will probably suffice for this application however there are times where we would need to do an entire wall and I don't know that the "Patch" is appropriate. Is a "Parge" as describe the same as Patch Concrete Wall, and if yes would be would it be possible to add "Parge" as a synonym for Patch Concrete Wall?	For Parging a concrete or masonry wall, the Patch Concrete Wall line item is close in price. We will add a synonym for Parging for the January database update. We will also add a new line item specifically for Parging per SF in the PLA-Stucco category. This item should be available for the February database update.
