

Release Notes

July 2020

CoreLogic Database Update

Summary of Changes:

- 6 RFI's closed for the month of June
- 125 new Item Operations added for the July Database Update

Database Updates:

- Standard monthly material price update
- New items in the July release include: New Sliding Barn Doors (interior) and related hardware, (Cabinet) End Panels per SF, Vinyl Picket Fence panels and more.
- Divided the CEF – Exterior Furnishings category into sub-categories for Free-Standing, Roof Mounted, Wall Mounted, and Other
- Moved Vent Pipe Flashing, Chimney and Vent Pipe Flashing, Furnace items from the HVC – Chimney and HVC – Furnace categories to the RFG – Flashing category. This change will align these items better with the other roof flashing choices in the database.

Item Image Updates:

- 66 new images have been rendered, completed, and uploaded for the July database update.

- Images focus on the floor covering, paneling, and finish carpentry & trimwork categories and correspond to 86 specific line items.
- 613 total images have been completed to date, covering 1058 specific line items.
- Future monthly updates will continue to have new images added as they are completed, as we continue to work toward the ultimate goal of building a comprehensive library of brand new images for the majority of items in the database

Assembly Updates:

(Fixes and Updates - Assemblies)

Assemblies

- Fencing
 - Added new options for vinyl fencing (privacy / picket).
 - Added new add-on items for colored vinyl fencing, gates, and posts.
- Asphalt Roofing
 - Fixed an issue where ridge singles were being added even when aluminum ridge venting was being used.
- Flooring
 - Added new question logic around removing ceramic tile from concrete floors along with supporting line items
- Siding
 - Fixed an issue where “meter socket” remove/reset was not being added properly when selected.

- Updated questions regarding remove/reset of house address number to work with the new item location within the database.
- Garage Doors
 - Added new options for recently released commercial overhead door item, (commercial) electric safety edge item, and residential and commercial support strut items.

DeskAdjuster Updates:

- ***(Fixes and Updates – DeskAdjuster)***
- Wind
 - Added new options for vinyl fencing (privacy / picket).
 - Added new add-on item for colored vinyl fencing, gates, and posts.

RFI's closed during June 2020

ID	Title	Content	Comments
3135770	Dock/Boat Lift Components	Client request to add components for docks and boat lifts to the database.	CoreLogic will add a category for piers, docks, boat lifts and accessories. This will require the addition of many new items, look for addition to the database in late 2020.
3136061	Shrink Wrap Building	Client request to add "Shrink Wrap" in the TMP – Temporary Repairs Category.	CoreLogic will add the item: <i>Shrink Wrap, Building</i> . The new Item should be available in the August or September database update.
3136490	Aluminum Gates	Client would like to add Aluminum Gates to the FEN – Ornamental Iron Fences Category. Currently the gates are not available as a standalone item.	CoreLogic will add the item: <i>Gate, Aluminum</i> in 4',5',6' heights to the August or September database update.

CoreLogic®

3138219	Drip Cap 3"	<p>Client question regarding the item <i>Drip Cap 3"</i></p> <p>The line item is supposed to be added/linked to windows and doors automatically. But it is only linking to windows. It will not link itself to doors. Even if you try to force the link it will not attach itself to exterior doors. On the interior, it will not attach to doors by default, but in the floorplan view, you can force the item to link. From the description of the item, it should be linked to both doors and windows</p>	<p>After talking with Symbility product management, we have decided to remove the link that was assigned to the Drip Cap item in the database. Removing the link will allow users to add the Drip Cap item wherever needed without being blocked. The horizontal dimension will have to be manually adjusted based on the top of the window or door. This adjustment will be included in the July database update.</p>
3136787	Vinyl Fencing	<p>Client would like to add 8ft tall Vinyl fence panels, and lattice fence toppers for vinyl and wood fences.</p>	<p>CoreLogic will add the following items: <i>Fence Panels, Vinyl 8', Lattice Top, Vinyl</i>, and <i>Lattice Top, Wood</i>. The new items should be available in either the September or October database update.</p>
3138219	Dumpster Bags	<p>Client request to add Dumpster Bags to the DMO – General Demolition category.</p>	<p>CoreLogic will add the item: <i>Dumpster Bags</i>, to a future database update. The item should be available in the August or September update.</p>

New Items Added for the July 2020 Database Update

Category	Item Description	Action	UOM
FEN - Vinyl Fences	Gate, Vinyl 5'	Rem/Reset	Each
FEN - Vinyl Fences	Gate, Vinyl 5'	Reset	Each
FEN - Vinyl Fences	Gate, Vinyl 5'	Remove	Each
